

Here's the verified version with tighter sourcing:

Stage	Current process	Confidence	Best available source
1. Citizen submission	Multi-channel: SAMEER app, web portal (app.cpcbcr.com/ccr), email, toll-free. Complaint gets an ID (e.g. CMPT_XXXXXXX) for tracking.	High	CPCB guidelines PDF; Play Store user review showing a live complaint ID; CPCB helpline listing
2. Central intake & monitoring	CPCB Central Control Room tracks daily complaint status and flags delays to agencies. (Manual transfer of web/email complaints into SAMEER is plausible but not independently confirmed.)	Medium	CPCB guidelines PDF
3. Routing to an agency	Assigned by location + pollution category to Traffic Police, Transport Dept, construction agencies, municipal bodies, etc. — within a 47-agency NCR integration.	High	CPCB guidelines PDF; Deccan Chronicle (confirms NCR-specific integration)
4. Departmental handling	Nodal officers from Urban Local Bodies are formally charged with resolving complaints within their department; dedicated IT/field teams support this (e.g. Green Delhi App team).	High	DPCC Annual Report 2020-21
5. Resolution evidence	Agency uploads action taken + documentary/visual proof to the same platform the complaint was filed on.	High	CPCB guidelines PDF
6. Tracking & escalation	Central Control Room monitors and notifies delays; no public evidence the 24-hour SLA is consistently met — real cases show it often isn't.	High (on the gap, not the SLA)	CPCB guidelines PDF; Deccan Chronicle (Hyderabad, 96 unresolved); Play Store reviews
